CUBE NETWORKS

Platform Services

Platform Services

What are Platform Services?

Our Platform Services encompass professional and managed services experts skilled across key facets of IT infrastructure.

We ensure the reliable operation of the platforms and applications that keep your business running, whether on-premises, in the cloud, or across a hybrid environment.

We specialise in managing and optimising your server environments, virtualisation, databases, application hosting, patching, and middleware to enable seamless integration, performance and security.

Why Partner with Cube for Platform Services?

We don't just manage infrastructure - we partner with businesses. We have experience across:

- Identity and Access Management
- Windows, Linux & Unix OS
- Private, Public & Hybrid Cloud
- Virtualisation Platforms
- Systems Management
- Database Management
- Patch Management & Integration Services
- Managed File Transfer, Backup & Recovery

Our Approach: Build, Manage, Optimise

Expert-led platform modernisation	Move from legacy systems to hybrid-ready infrastructure
Containerisation and Orchestration	Prepare applications for the future
Automation and Standardisation	Automation and Standardisation
Agile Staffing Solutions	Provide skilled team members to augment customer capability
Seamless migrations	Structure projects to enable deployment without business impact
Security-first Platform operations	Ensure policy enforcement across cloud and on-prem
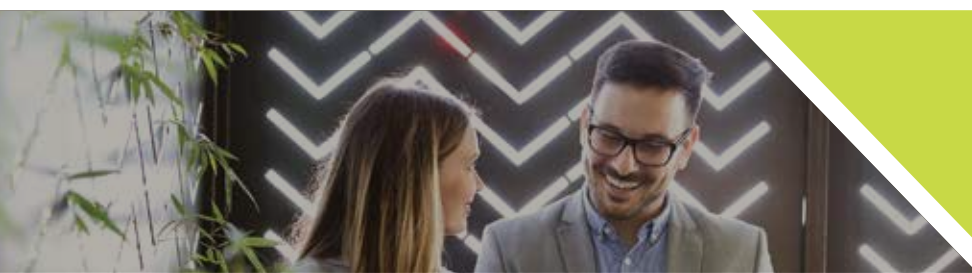

Business Benefits

- Bring industry leading expertise for critical projects
- Lower total cost of ownership with platform consolidation and modern licensing
- Improve flexibility and responsiveness to business demand
- Improved resilience through proactive patching, monitoring and backups
- Enable next generation applications through container-ready environments
- On-prem, cloud and cloud-edge infrastructure tailored for cloud-native and legacy needs
- Provide operational scale without increasing internal headcount
- Backfill internal teams to release capability for business growth
- Enhance compliance and security across diverse workloads

What we Can Support

Category					
Server and Storage systems	NetApp	Cisco UCS Manager	Lenovo	hp	DELL EMC	veeam
