Prism Cyber Maturity Benchmark

Prism Cyber Maturity Benchmark

Our Cybersecurity Maturity Benchmark is designed to provide a comprehensive assessment of your organisation's cybersecurity posture, and helps you strengthen your protections through a structured approach and expert-led review.

Our Cybersecurity Maturity Benchmark is a 360 Degree View

We include all the key security elements as a part of our assessment:

- **Security Governance Review:** We assess the existence and maturity of your key governance documents, including your cybersecurity framework, strategy, risk management policy, and security policies.
- **AI Readiness Assessment:** Reviewing your policies and controls for AI access and deployment.
- **Security Architecture Assessment:** Using a simplified NIST-aligned architecture model, we identify and illustrate gaps in your security toolset. This visual representation highlights areas that need immediate attention and improvement.
- **Internal Environment Testing:** Our assessment covers vulnerability management, Identity and Access Management (IDAM), endpoint security, perimeter controls (such as firewalls), cloud configuration, Active Directory configuration, email protection, and backup strategy.
- **External Environment Testing:** We enumerate your external-facing environment and attack surface, then scan for weaknesses and vulnerabilities that could be exploited by attackers.

Our Engagement Options:

Available in **Silver** and **Gold** tiers, this service provides clear visibility into risks, governance gaps, and technical vulnerabilities, along with actionable recommendations for improvement.

SILVER — Baseline Security Benchmark	GOLD — Enhanced Security Insights
Foundational security assessment with governance review and technical validation.	Everything in Silver plus cloud security, Active Directory audit, and threat intelligence.
Included Services:	**All Silver Features Plus:**
☑ Design-level assessment of 20 foundational security controls	☑ Active Directory Audit
☑ Review of key governance documents	☑ Cloud Security Posture Management (M365 & one Cloud environment)
☑ External: Attack Surface Enumeration & Vulnerability Scans	☑ Security Reference Architecture Review
☑ Internal Technical validation including:	☑ Threat Intelligence Report
• Email Security (DMARC, SPF, DKIM)	☑ Enhanced Recommendations with Prioritised Roadmap
• SOE Config and Password Audit	
• Egress port filtering	
☑ Report on Observations, Risk ratings & Recommendations	
☑ Executive Summary Report (including Essential 8 Maturity)	
SILVER: $9,950 AUD + GST	**GOLD: $17,500 AUD + GST**

What You'll Receive

Our Cybersecurity Maturity Benchmark delivers:

Comprehensive Report: A standardised, easily digestible report highlighting key findings, actionable recommendations, and areas for improvement.

Maturity Graphics: Visuals that clearly show your current security posture including against the ASD Essential 8

Quick Wins: Identification of low-hanging fruit for immediate action, providing you with quick wins that enhance your security posture.

Strategic Planning Material: Insights and recommendations that can inform your future cybersecurity strategy and assessment plans.

Benefits to Your Organisation

Actionable Insights: Immediate identification of critical vulnerabilities and areas for improvement.
Non-Intrusive Process: Minimal disruption to your operations with a quick turnaround on deliverables.
Future-Ready: Material that prepares your organisation for long-term cybersecurity resilience.

Pricing

The Prism Cyber Maturity Benchmark is delivered as a fixed-price engagement.

Our Timeline

Our standard service is designed to be delivered in 10 working days. Our flexible delivery model allows this to be spread across a longer period to suit your organisation and team availability if required.
